

METHODS, SYSTEMS AND COMPUTER PROGRAM PRODUCTS FOR  
CONTROLLING CACHING OF DISTRIBUTED DATA

Abstract of the Disclosure

5           Controlling a cache of distributed data is provided by dynamically  
determining whether and/or where to cache the distributed data based on  
characteristics of the data, characteristics of the source of the data and  
characteristics of the cache so as to provide an indication of whether to cache the  
data. The data may be selectively cached based on the indication.
